CAREER SUMMARY:

Result Driven IT Project Manager with **11+ years of overall experience** delivering **enterprise technology platforms, cloud-hosted solutions, SaaS products, and system integrations** across **BFSI, FinTech, E-Learning, Warehouse Management and Digital Commerce** domains. Proven expertise in **end-to-end project delivery, Agile/Waterfall methodologies, stakeholder management, and regulatory-compliant environments**, coordinating cross-functional engineering teams, vendors, and stakeholders to deliver scalable, secure, and high-availability solutions. Strong exposure to **platform implementations, API-driven integrations, cloud environments, UAT, release management, and production go-lives**, with a hands-on, execution-focused approach aligned to enterprise standards, also focused on leveraging Generative AI tools to enhance project planning, requirement analysis, and delivery efficiency. Skilled in global project demand management, risk mitigation, and governance, collaborating with technology providers and business users to align IT strategy with business objectives.

Certified Scrum Master (CSM®) and ITIL Foundation Certified, proficient in MySQL, Postman, Click-up, Trello and Jira, managing business communications, stakeholder reporting, and regulatory initiatives to drive operational efficiency and digital transformation.

PROFESSIONAL EXPERIENCE:

D2K Technologies Pvt. Ltd. (A Group ICRA Company)

- Project Manager || 05/2025 — 12/2025

- Led end-to-end delivery of enterprise FinTech platforms including Loan Origination Systems (LOS), risk analytics platform (Asset classification and provisioning) solutions for banking clients in UAE and India.
- Owned project execution across requirements finalization, system design coordination, development tracking, UAT, and production releases.
- Leveraged Generative AI tools (ChatGPT, Gemini) to accelerate **requirement documentation, user story creation, and test case generation**, improving delivery efficiency by ~30%.
- Coordinated API-based integrations, ETL processes, and middleware connectivity between internal banking systems and external platforms.
- Ensured compliance-aligned documentation and delivery to support audit and regulatory expectations
- Created BRD, FRD, SRS, data mapping sheets, and solution documentation, ensuring clear functional specifications for development teams.
- Worked closely with technical teams to explain concepts, system logic, validations, and exception scenarios, ensuring accuracy in solution design and issue resolution.
- Led UAT planning and execution, defined test plans, coordinated defect triaging, and validated banking functionality across multiple testing phases.
- Participated in PWT (Product Walkthrough) & user training sessions, ensuring business readiness and adoption of new functionalities. Managed change requests, version releases, and deployment cycles to ensure smooth transitions into UAT and production environments.
- Facilitated Agile ceremonies, sprint planning, backlog grooming, and release tracking using Jira and Confluence.
- Oversaw API/SDK integrations, automation logic, and data-driven feature enhancements.

Kapiz Innovators Pvt Ltd

- Technical Project Manager & Director || 02/2024 – 05/2025

- Spearheaded the development and successful deployment of FashQuik, a quick-commerce fashion delivery platform.
- Designed innovative features like Try & Buy, Insta Returns, Last Mile Delivery, and Omni Channel Store Fulfillment model, drastically improving user satisfaction and setting FashQuik apart from competitors.
- Leveraged Generative AI tools (ChatGPT, Gemini) to accelerate **requirement documentation, user story creation, and test case generation**, improving delivery efficiency by ~30%.
- Led cross-functional teams including backend, frontend, mobile, QA, and infrastructure, ensuring on-time delivery and quality benchmarks.
- Led implementation of automated billing and GST-compliant invoice generation for e-commerce transactions, enabling real-time invoice creation for customer orders and integration with payment gateways and accounting workflows.
- Defined functional requirements for invoice lifecycle management including order billing, tax calculation, invoice generation, and reconciliation with payment transactions.
- Coordinated integration between order management system, payment gateways, and financial reporting modules to support digital invoicing and transaction tracking. Built cloud-native scalable infrastructure to handle exponential growth and high transaction volumes.
- Defined and executed the technical roadmap, ensuring product scalability, performance, and a seamless user experience.
- Oversaw release planning, deployment cycles, and platform stability during rapid scaling phases.
- Managed vendor relationships and third-party integrations, working closely with legal and compliance teams to ensure operational efficiency and contractual alignment and worked closely with business stakeholders to align technical execution with operational and commercial goals.

Hurix Systems Pvt. Ltd

- Associate Project Manager || 05/2021 – 11/2023

- Managed delivery of enterprise SaaS and cloud-hosted platforms across E-learning, Health, Publishing and Banking domains, serving 20+ clients across the US, EU, and APAC on web, iOS, and Android platforms.
- Led cross-functional Agile teams to implement SaaS and PaaS solutions, ensuring delivery excellence, client satisfaction, and regulatory adherence.
- Led end-to-end technical project delivery across web, mobile (iOS/Android), and platform solutions.
- Maintained project governance including project plans, risk registers, dependency tracking, and stakeholder reporting.
- Established robust QA and defect management processes, driving issue resolution, RCA, and SLA compliance across projects.
- Oversaw integrations and custom development projects such as Single Sign-On (SSO), ETL data flows, and user management services, including technical integrations through Class Link, Google Classroom APIs, LTI, and SAML.

WhiteHat Education Pvt Ltd

- Technical Support Engineer || 05/2020 – 03/2021

Azuma Hospitality LLP

- IT Engineer || 07/2018 – 01/2020

Sharooq Al Madina Tours and Travels

- Travel Sales Consultant || 01/2013 – 08/2015

Spanco Bpo Ltd (Respondez – International Wing)

- Sales Executive || 06/2011 – 01/2013

Mathcoms LLC (USA)

- Freelance Project/Product Manager

- Led **end-to-end delivery of PMIQ**, an AI-driven platform focused on **automation workflows, data-driven insights, and intelligent process optimization**.
- Defined **product vision, BRDs, SRS, user journeys, Jira and automation logic**, aligning business requirements with technical implementation.
- Collaborated with Architects, **AI/ML engineers, backend developers, and UI/UX teams** to deliver scalable and user-centric features.
- Managed **Agile delivery lifecycle**, including sprint planning, backlog prioritization, and release tracking using **Jira and Confluence**.
- Oversaw **API integrations, data workflows, and system enhancements**, ensuring seamless platform functionality.
- Drove **product improvements through iterative releases**, focusing on performance, usability, and automation efficiency.

KEY PROJECTS:

- **PMIQ – AI-Enabled Project Management Platform (Freelance)**
 - Led end-to-end delivery of an AI-driven project management tool, defining BRDs, SRS, user flows, and automation workflows
- **FinTech LOS & Risk Platforms (Banking – D2K Technologies)**
 - Delivered Loan Origination Systems (LOS) and risk & compliance platforms for UAE and Indian Banks
 - Supported asset classification, provisioning, and regulatory reporting systems
- **FashQuik – Quick Commerce Fashion Platform**
 - Delivered a last-mile fashion delivery app with features like Try & Buy and Insta Returns, supporting scalable transactions
- **Dookaans – Inventory Management System**
 - Developed a system to improve inventory tracking, warehouse management, reporting, and operational efficiency
- **Zanichelli – PWA & AI Learning Assistant (K.AI)**
 - Delivered Progressive Web App (PWA) and AI-based learning assistant to enhance user engagement and accessibility
- **Freelancing** - Developed multiple responsive Angular-based websites and dashboards for small businesses, including product listing pages, admin dashboards, and customer portals.

TECHNICAL & CONSULTING SKILLS:

- **Project & Delivery Management:** Proven expertise in end-to-end project management delivery using Agile, Scrum, Waterfall, and PMP-aligned frameworks to drive successful delivery of complex, cross-functional projects aligned with strategic business goals and expertise in SDLC, sprint planning, backlog management, and release governance.
- **Tools & Technologies:** Advanced proficiency in MySQL, Postman, Jira, Zoho, Trello, Asana, Slack, Basecamp, Confluence and Click Up.
- **Generative AI tools:** ChatGPT, Gemini, Claude; data-driven decision-making and workflow automation.
- **Cross-Functional Leadership and Stakeholder Management:** Skilled in leading and motivating diverse teams across business, technology, and operations to foster collaboration, streamline workflows, and enhance productivity. Strong communication skills to deliver clear project updates, stakeholder engagement, expectation management, and alignment with organizational priorities and compliance requirements
- **Risk, Budget & Resource Management:** Risk assessment & mitigation, budget planning, resource allocation, financial tracking, and governance reporting, and resource allocation ensuring projects are delivered on time and within financial constraints.
- **Business & Technical Documentation:** Skilled in translating business needs into structured documents including BRD, FRD, SRS, User Stories, Data Mapping, Wireframes, Use Cases, and Acceptance Criteria; ensuring alignment between business and development teams.
- **Integration & Data Systems:** Hands-on experience with API-based integrations using REST, SDKs, SAML, OAuth; familiarity with CDP platforms, ETL processes, middleware, and Data Lake ecosystems for analytics, reporting, and compliance.
- **Frontend Development:** Hands-on experience building small-to-medium Angular applications (Angular 15+), including component-based architecture, services, routing, forms, and REST API consumption for freelance web projects.
- **SQL & Database Skills:** Strong foundation in SQL for data extraction, reporting, JOINS, Views, Stored Procedures, and debugging application issues using MySQL & SQL Server.
- **Cloud, DevOps & System Architecture:** Working knowledge of AWS (EC2, S3, IAM, RDS, Lambda) with experience supporting microservices-based architectures, REST APIs, middleware, and API gateways, enabling scalable integrations with cross platforms.
- **Application Debugging & API Testing:** Extensive usage of Postman, Swagger, and Chrome Dev Tools for API testing, contract validation, payload debugging, and integration QA.

ACADEMIC QUALIFICATIONS:

- **Bachelor of Science Information Technology**
Kalinga University | 2015 – 2018
- **Aircraft Maintenance Engineer Course**
Indian Aerospace and Engineering | 2007 – 2011

CERTIFICATIONS:

- Conflict Management and De-Escalation in Customer Service
- Certified Scrum Master (CSM®)
- Introduction to SQL, Oracle DBA Orientation and Front-End Web Development
- ITIL Foundation
